PART II - SCRIPTURES

LONDON :

1920

## INTRODUCTORY NOTE.

A FEW of those who have known and loved Mr. Raven have thought it good to put together an index of the twenty volumes—"NOTES OF LECTURES"—already a valuable collection, with the hope of rendering them still more serviceable, as a work of reference, to the many who appreciate what the Lord has been pleased to give to His Church through His beloved servant; trusting also that this index will prove to be a great convenience to all those who have in their bookshelves the whole or only a few of the twenty volumes.

The index is divided into two parts: *i.e.* (1) Subjects and (2) Scriptures. Part I contains references to the main subjects of Addresses and Readings; also a large number of subjects to which side references are made in both the Addresses and the Readings. Part II contains references to those Scriptures upon which the ministry in both the Addresses and Readings is directly based, as well as a few Scriptures introduced in the course of both.

## EXPLANATORY NOTE.

VOLUMES xiv to xx are, each one, consecutively paged from beginning to end, but each of the remaining thirteen volumes comprises from two to seven books or papers, having each one its own separate paging. In order to meet this difficulty, a simple system of lettering has been adopted in indexing, as follows:—Each item in the first separately paged part of a volume has the Roman volume number and page number, thus: Vol. i. 5. Each item in the *second* set of paging has the volume number with the letter “(a)” after it and then the page number, thus: Vol. i (a) 5. The third set has “(b)” after the Roman numeral, and so on. For example:—

Law of the moral universe vii (a) 21

A reference to this subject will be found on or about page 21 of the *second* set of paging (*not* the first); or again:—

Christ the resource of God vi (b) 36

This will be found in the third set of paging of volume vi.

The small letters thus used are of course not found in the volumes themselves, but it may be found worth while just to run over the volumes with a pencil, marking them on the right-hand page at intervals, say, 5, 11, 15, 21, 25, etc., with a letter "a," "b," etc., according to the section to which the paging belongs. This will greatly help the use of the index, and the whole of the volumes i to xiii could easily be thus marked in little over an hour.
